

SAFETY ALERT 101

ALFABS WORK PLATFORM Crush Injury

This Safety Alert has been issued to inform the users of Alfabs Work Platform of a minor risk of injury to operators, through the use of unapproved accessories with Alfabs Work Platform.

Event

An operator received a crush injury to his right hand while inserting a Cable Roller into the designated area on an Alfabs Work Platform. The Cable Roller which caused the injury was not designed or manufactured by Alfabs Mining. The Cable Roller was shorter than required allowing it to create a pinch point hazard.

Recommendations

Only use Alfabs Mining manufactured accessories with the Alfabs Work Platform to minimise the risk of injury to operators.

Notes

Please ensure all relevant people in your organisation receive a copy of this Safety Bulletin, and are informed of its content and recommendations. This Safety Bulletin should be processed in a systematic manner through the mine's information and communication process. It should also be placed on the mine's notice board.
